Nursery Station: First Transplant.	p. IX

FIRST TRANSPLANT

AFTER TWO WEEKS YOUR SEEDLINGS ARE READY FOR THEIR FIRST TRANSPLANT THEY WILL SPEND THE NEXT TWO TO FOUR WEEKS IN A SMALLER FLOATING ROOT SYSTEM TO SAVE SPACE. WE CAN CALL THIS SMALLER VERSION THE NURSERY. ONCE YOUR PLANTS BEGIN TO SHADE ONE ANOTHER THEY ARE READY TO TRANSPLANT FROM THE NURSERY INTO THE LARGER SYSTEM DEPICTED IN SECTION 3 FOR THE FINAL WEEKS UNTIL HARVEST (AS TIMES CHANGE FROM DIFFERENT VEGGIES)

WHAT DO YOU NEED :

SEEDLING READY TO
BE TRANSPLANTED

NUTRIENT SOLUTION
- FERTILIZER + WATER

V

FOAM SHEET

STYROFOAM BOARDS

WOOD -
CAN BE RECLAIMED

TOOLS :

VI

ALUMINIUM TUBE ϕ 2.5 CM

THE FOAM CUBES METHOD.

1

FOAM SHEET

2

CUT THE FOAM
INTO ONE INCH
STRIPS

3

THEN CUT
INTO ONE
INCH CUBE

4

CUT IN SLIT IN
THE CENTRE
OF THE CUBE

5

INSERT THE SEEDLING
INTO THE FOAM CUBE.
YOU MIGHT WANT TO USE
A TWEEZER

6

THE SEEDLING IS READY
FOR FIRST TRANSPLANT
MAKE SURE THE HEAD
OF IT IS JUST ABOVE
THE SURFACE.

NURSERY STATION : FIRST TRANSPLANT

THIS IS HOW YOUR SET UP SHOULD LOOK LIKE. THE SIZE OF THE SET UP CAN CHANGE UP TO YOUR NEEDS TWO OF THOSE NURSERY SYSTEMS SUPPORT WEEKLY HARVEST OF ONE FLOATING ROOT SYSTEM.
